CONFIGURED SOLUTIONS™

Food Service

ABOUT NEX-TERRA

Nex-Terra is a US manufacturer of customized waste and recycling solutions and site furnishings. Alongside our distributor partners, we brought tailored waste and recycling solutions to the marketplace. Nex-Terra's original designs are easily recognized by their stylized arches, post and panel design, and contrasting colors.

CUSTOMIZATION

Our ability to customize any order allows us to create a solution that will meet your facility's unique needs and requirements.

MATERIAL

Nex-Terra products are constructed from Type-2 HDPE, the purest form of recycled plastic available in the industry today.

SUSTAINABLE MATERIAL

Our waste and recycle bins come standard with the Nex-Terra milk jug. The number on the milk jug identifies how many were reclaimed in its manufacture.

DURABILITY

Our hand-built construction methods, combined with our material's inherent strength and longevity, ensure that our products won't rot, rust, or mold and will outlast all others in the marketplace.

LEED CERTIFICATION

The use of our products may contribute to LEED Certification under MR 4.1 and MR 4.2.

NEX-TERRA PARTNERSHIP

Nex-Terra is a part of a family of brands located in Sussex, WI. Our sales support staff partners with our distributor network to provide unlimited training and support. With access to Nex-Terra's in-house engineering and design teams, we'll provide conceptual renderings, engineer drawings, and unlimited design services to ensure that you receive a product that will meet all of your functional and aesthetic needs.

FOOD SERVICE

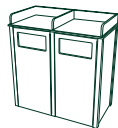

Our food service solutions allow you to coordinate your waste and recycle and food service needs. With a variety of products, from waste and recycle bins, compost options, self-service stations, to bussers and podiums, you'll find everything you need to create a coordinated, functional facility.

HARVEST COLLECTION
Allows for easy disposal of food scraps and comes standard with tray returns.

BUSSER + WASTE
Provides a central location for quick cleanup and table turn around.

WASTE & RECYCLE
Add tray returns to any of our waste and recycle bins.

COMPOST
Easily integrate post-consumer compost into your stream collection.

FOOD SERVICE

WASTE & RECYCLE

Our waste and recycle collections can be customized to meet your food service needs.

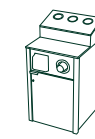

HARVEST

Our original food service solution is available in 26-55 gallon capacities and can accommodate up to six waste streams.

BUSSER + WASTE STATION

This combination station is the ideal waste and dish collection solution for both waited and self-service dining.

MODULAR UNIT

Available in up to four sections, create a modular food service unit to meet your exact needs.

CUSTOMIZATION GUIDE

Nex-Terra waste and recycle bins excel at meeting unique aesthetic requirements while maintaining the balance of branding, messaging, and recycling success. Our customization process allows you to create a solution that will match your facility's aesthetic requirements, meet your organization's brand standards, and maintain your functional waste and recycle needs.

1

CONTRASTING COLORS

Our signature contrasting color option allows a facility to match their unique aesthetics or brand standards.

2

SYMBOLS

Are essential to clear stream identification, especially in high-traffic areas or when language is a barrier.

3

OPENING IDs

Clearly labeled streams are essential to any waste and recycle station.

4

INTERCHANGEABLE TOPS

Provide flexibility to update waste streams as a recycling program grows.

5

RESTRICTIVE OPENINGS

Allow a facility to tailor their bins to the waste streams they collect, providing one more barrier to cross-contamination.

6

HEADER BOARDS

Allow organizations the ability to further identify waste streams or promote their sustainability program.

OUR CUSTOMIZATION PROCESS

Our unique design process allows an organization to create a customized bin for every area of their facility. Six signature collections and thousands of options ensure that neither aesthetics nor function have to be sacrificed for a successful waste and recycle program.

CHOOSE YOUR COLLECTION AND LOAD DIRECTION

Choose from one of our six signature collections and select between top or front deposit. We recommend a top load bin for indoor applications and a front load bin for outdoor.
