

CONFIGURED SOLUTIONS™

Site Furnishings

ABOUT NEX-TERRA

Nex-Terra is a US manufacturer of customized waste and recycling solutions and site furnishings. Alongside our distributor partners, we brought tailored waste and recycling solutions to the marketplace. Nex-Terra's original designs are easily recognized by their stylized arches, post and panel design, and contrasting colors.

CUSTOMIZATION

Our ability to customize any order allows us to create a solution that will meet your facility's unique needs and requirements.

MATERIAL

Nex-Terra products are constructed from Type-2 HDPE, the purest form of recycled plastic available in the industry today.

SUSTAINABLE MATERIAL

Our waste and recycle bins come standard with the Nex-Terra milk jug. The number on the milk jug identifies how many were reclaimed in its manufacture.

DURABILITY

Our hand-built construction methods, combined with our material's inherent strength and longevity, ensure that our products won't rot, rust, or mold and will outlast all others in the marketplace.

LEED CERTIFICATION

The use of our products may contribute to LEED Certification under MR 4.1 and MR 4.2.

NEX-TERRA PARTNERSHIP

Nex-Terra is a part of a family of brands located in Sussex, WI. Our sales support staff partners with our distributor network to provide unlimited training and support. With access to Nex-Terra's in-house engineering and design teams, we'll provide conceptual renderings, engineer drawings, and unlimited design services to ensure that you receive a product that will meet all of your functional and aesthetic needs.

SITE FURNISHINGS

Our site furnishing solutions allow you to coordinate your outdoor and indoor site furnishings. Thanks to Nex-Terra's signature material, 97% pure recycled plastic, all of our solutions are virtually maintenance free. Our material never needs painting and is resistant to mold, mildew and won't harbor insects, allowing you to furnish both your indoor and outdoor spaces with products that have been proven to outlast all others in the marketplace.

BENCH

Add convenient and comfortable seating to outdoor areas.

DOGGIE WASTE STATION

Give visitors the tools they need to keep your property tidy.

MESSAGE CENTER

Provide a central location for visitors to find the information they need.

ROUND WASTE

Round waste enclosures can be customized to meet your needs and are available in capacities ranging from 10-55 gallons.

SQUARE PORTABLE DOGGIE WASTE STATION

ROUND PORTABLE DOGGIE WASTE STATION

DOGGIE WASTE STATIONS

Enable guests to help keep your surroundings clean with a permanent or portable Doggie Waste Station. Available in three capacities and a variety of heights.

SQUARE PERMANENT DOGGIE WASTE STATION

ROUND PERMANENT DOGGIE WASTE STATION

SIGN & BOX KIT

When you're unable to provide a Doggie Waste Station but still want to offer bags for easy clean up, our sign and box kit can be mounted wherever your space allows.

MESSAGE CENTER

Provides a central location for maps, bulletins, and other necessary messages.

ROUNDS

Available as a permanent or portable fixture and in capacities ranging from 10-55 gallons.

BENCH

Add a logo or custom message to your bench.

CUSTOMIZATION GUIDE

Nex-Terra waste and recycle bins excel at meeting unique aesthetic requirements while maintaining the balance of branding, messaging, and recycling success. Our customization process allows you to create a solution that will match your facility's aesthetic requirements, meet your organization's brand standards, and maintain your functional waste and recycle needs.

1

CONTRASTING COLORS

Our signature contrasting color option allows a facility to match their unique aesthetics or brand standards.

2

SYMBOLS

Are essential to clear stream identification, especially in high-traffic areas or when language is a barrier.

3

OPENING IDS

Clearly labeled streams are essential to any waste and recycle station.

4

INTERCHANGEABLE TOPS

Provide flexibility to update waste streams as a recycling program grows.

5

RESTRICTIVE OPENINGS

Allow a facility to tailor their bins to the waste streams they collect, providing one more barrier to cross-contamination.

6

HEADER BOARDS

Allow organizations the ability to further identify waste streams or promote their sustainability program.

OUR CUSTOMIZATION PROCESS

Our unique design process allows an organization to create a customized bin for every area of their facility. Six signature collections and thousands of options ensure that neither aesthetics nor function have to be sacrificed for a successful waste and recycle program.

CHOOSE YOUR COLLECTION AND LOAD DIRECTION

Choose from one of our six signature collections and select between top or front deposit. We recommend a top load bin for indoor applications and a front load bin for outdoor.

SUPERIOR COLLECTION

ALBANY COLLECTION

SHERWOOD COLLECTION

BERKELEY COLLECTION

HARVEST COLLECTION

PIONEER COLLECTION

CHOOSE YOUR GALLON CAPACITY

Available in seven different capacity options, create a bin with one capacity for each stream or mixed capacities to accommodate collection size.

CHOOSE YOUR NUMBER OF STREAMS

Customize the number of bin streams to match what is being collected in each area of a facility.

CHOOSE YOUR ROOF STYLE

Roof style should vary with bin location, we recommend curved or vail for outdoor use.

CREATE YOUR BIN
